Please visit our web site to know more about us...(<http://www.groupe-casino.fr/accueil/index.php?&lang=en>)

France market (Casino / C-Discount / Monoprix / Leader Price)

Being Casino's business partners, all potential suppliers must agree with our business and sign the business contract - **EMC BAZZAR CHART 2009.07**, which requires all suppliers to :

- Fill the supplier + factory profile
- Sign with company chop on right bottom corner of all 36 pages, then send original copy by courier to EMC HK office.

France Trade term

- Casino France : LC 60/90 days
- Price is the same for LCL and FCL. FCR instead of B/L to be submitted for LC negotiation
- Price must be valid for minimum 6 months from the date of quotation
- All sample charges and courier charges are included in the quotation

France Quality Requirement

- LVD+EMF certificate and test report with latest directives (issued within two years to ETD date)
- LVD with latest A12:2007 of EN60335-2-9:2003
- EMC certificate and report (issued within two years to ETD date)
- French food contact report, DGCCRF (issued within 1 years to ETD date), don't accept LFGB.
- ErP report (issued within two years to ETD date)
- RoHS survey report (issued within one year to ETD date), don't accept component ROHS report.
- REACH self-declaration form (excel + pdf/jpg with company chop and authorized signature)
- All test reports must be issued by acceptable laboratories by Casino
- Factory must be approved by Casino's or Casino appointed auditor
- Drop Test for master carton (as per last two page in this document)

France Quality Approval Process

- Pre-CC test
- Pre-shipment inspection
- After Pre-CC test
- Noted: All test fee / inspection fee will be absorbed by Casino for the 1st time being. While for any re-inspection / re-test, it will be absorbed by supplier.

Factory approval process

- Done by Casino. Factory audit result with Grade "B" or above will be treated as approval manufacturer

PSI (Pre-shipment inspection) + After CC (Construction check after production)

- Factories arrange inspection date with BV 5 weeks in advance to CRD stated on LC
- Goods must be 100% completed production and 100% packed in final packaging before PSI date
- Inspection sampling Level & Rate : Single / Normal / General Level II, S-3 / Drop Test by BV
- AQL : Critical Defective: 0; Major Defective 1.5; Minor Defective: 4.0
- BV seals 4-5 pcs samples from inspected lot.
- Factories deliver BV sealed samples to **BV HK for LVD critical test**
- Casino France will be responsible for BV test for **only first time** of Pre-CC, PSI and After CC Test.
- If PSI or After CC result is FAILED, supplier should bear all re PSI fee, re-After CC cost, and possible Express Service charged by BV (LCIE HK)

Shipment release

- After **both PSI result and After CC result are PASS, QUALITY AGREEMENT** will be confirmed by email.
- Shipment can be arranged once QUALITY AGREEMENT and SHIPPING ORDER are released.
- Suppliers arrange shipment and send shipment information to Casino HK office – Logistic Department
- **1 pc Shipment sample** to be delivered to EMC HK office right after PSI is PASS in FIRST order.

Gift box

- France and English feature - translation to be provided by supplier, suppliers arrange the GB artwork for EMC's approval.
- Design done by France side.

I/M

- French I/M translation to be provided by supplier, Casino proceed the artwork upon rec'd French IM
- You can check with our appointed translator : Data Source Mar for translation cost.

Drop Test Method

Before the drop test, the pieces in the test packaging must free of defects.

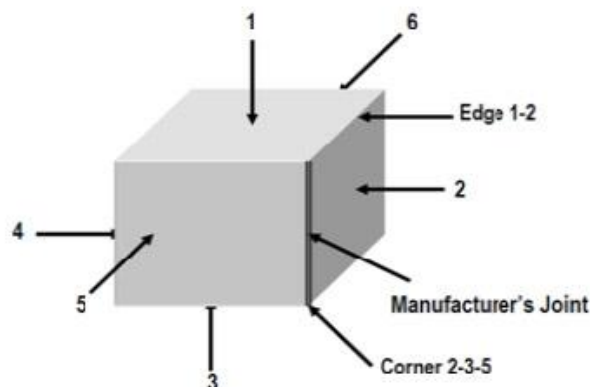

- **Transportation outer carton:** for carton packing quantity over 12 pieces, at least 12 pieces should be placed at the corner which will be used for the first drop (sequence #1). All pieces must free of defects.
- **Individual unit packaging:** the test unit must free of defects.

For transportation outer carton (refer ISTA 1A)

- Test height

Packaged –Product Weight				Drop height	
Equal to greater than		But less than		Free fall	
lb	Kg	lb	kg	in	mm
0	0	21	9.5	30	760
21	9.5	41	18.6	24	610
41	18.6	61	27.7	18	460
61	27.7	100	45.3	12	310
100	45.3	150	68	8	200

- Identify the Orientation of Carton

- Test Sequence

Follow the sequence in the table as below:

Sequence#	Orientation	Specific face, edge or corner
1	Corner	Most fragile face 3 coner (the joint edge coner), if not know, test 2-3-5
2	Edge	Shortest edge radiating from the corner tested
3	Edge	Next lonest edge raiating from the corner tested
4	Edge	Longest edge raiating from corner tested
5	Face	One of the samllest faces
6	Face	Opposite small face
7	Face	One of the medium faces
8	Face	Opposite medium face
9	Face	One of the largest faces
10	Face	Opposite large face

Table 3 - Define the drop sequence from corner, edge to facce

顺序	定位	测试位置具体描述
1	角	面 2-3-5 相交的角
2	边	由面 2-3-5 相交角延伸的最短边
3	边	由面 2-3-5 相交角延伸的第二长边
4	边	由面 2-3-5 相交角延伸的最长边
5	面	最小面之一
6	面	最小面的相对面
7	面	第二大面之一
8	面	第二大面的相对面
9	面	最大面之一
10	面	最大面的相对面

3. The check points after the export carton drop test are ;

- * Check for any damaged on the housing of the unit (the export pack and Gift box may have a little bit damage are normal)
- * Check again the Hi-pot and Earth continuity...safety test no any break down after the drop test.
- * The unit can switch on and in normal functioning.
